PROFESSIONAL SUMMARY

Full-Stack Java Developer with practical experience building web applications and backend systems using Core Java, Spring Boot, React.js, and MySQL. Hands-on experience developing RESTful APIs, designing relational database schemas, and structuring modular code following OOP principles. Experienced in diagnosing and fixing bugs, writing clean and reusable code, and collaborating in Agile sprint cycles.

TECHNICAL SKILLS

Languages & Core: Java (Core Java), JavaScript, TypeScript, Python, SQL, OOP Principles

Backend & Frameworks: Spring Boot, Microservices Architecture, RESTful APIs, Node.js, Express.js

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Databases: MySQL, MongoDB Atlas, Relational Database Schema Design

Tools & Methodologies: Git, GitHub, Unit Testing, Debugging & Troubleshooting, Agile/Scrum, MVC Pattern

WORK EXPERIENCE

Intern Software Engineer | Scalefull Technologies LLP

01/2026 – 07/2026 | Pune, Maharashtra

- Built and maintained full-stack web application modules using React.js and backend services, focusing on reusable components and clean code structure.
- Developed secure RESTful APIs, integrated user authentication workflows, and optimized database queries to improve data response times.
- Identified, reproduced, and resolved functional bugs and UI defects across development and testing environments.
- Collaborated in daily Agile stand-ups, participated in sprint planning, and coordinated with remote team members on code reviews.

Web Development Intern | Cyphersa Software LLP

07/2022 – 01/2023 | Nashik, Maharashtra

- Developed responsive user interface components and integrated client-side forms using React.js and modern JavaScript.
- Tested REST API endpoints and worked alongside the QA team to identify, log, and troubleshoot application bottlenecks before release.
- Assisted in refactoring existing frontend code to ensure consistent cross-browser compatibility and faster rendering.

KEY PROJECTS

STPI Asset Inventory Software

Tech Stack: Core Java, Spring Boot, React.js, MySQL, RESTful APIs

- Built an internal enterprise asset management portal to track hardware and software inventory, asset assignments, and service lifecycles.
- Designed and normalized the MySQL database schema to handle asset metadata, vendor warranties, allocation records, and audit logs.
- Implemented secure REST APIs in Spring Boot with role-based access control (Admin, Support, Staff) for issuing and returning assets.
- Built an interactive React.js dashboard with dynamic filtering, real-time search, and tabular reports for stock audits.

Saathi App

Tech Stack: Java, Spring Boot, Microservices Architecture, React.js, MySQL, REST APIs

- Developed a full-stack platform to streamline user onboarding, community service requests, and issue ticket tracking.
- Structured backend functionality into modular Spring Boot services following MVC and OOP design patterns for high code reusability.
- Integrated responsive React frontend forms with client-side validation and connected them to backend APIs with error handling.
- Wrote unit tests for critical business logic and debugged API integration issues to maintain data consistency across components.

EDUCATION

- Bachelor of Engineering in Computer Engineering** | YTIET, Mumbai (09/2023 – 2026)
- Diploma in Computer Engineering** | MIT Polytechnic, Nashik (07/2021 – 05/2023 | Aggregate: 76%)
