## PROFESSIONAL SUMMARY

Final-year Computer Engineering student with hands-on experience in Full-Stack Development, Backend Engineering, and AI-powered applications. Skilled in Java, Spring Boot, React.js, Python, and MySQL, with experience building scalable web applications, REST APIs, and microservice-based systems. Strong foundation in problem-solving, database design, and modern software engineering practices.

## EXPERIENCE

### Software Engineering Intern

12/2025 – Present | Bangalore, Karnataka

K2 Ventures (Husys Group)

- Developing robust backend services and scalable RESTful APIs using Python (FastAPI/Django) to support healthcare technology solutions.
- Collaborating in an Agile/Scrum environment to write clean, maintainable code and optimize system performance.
- Participating actively in daily stand-ups and sprint planning to ensure the timely delivery of critical software modules.
- Optimized data workflows and generated technical reports using MySQL for efficient data management and system monitoring.

### Intern Software Engineer

01/2026 – 07/2026 | Pune, Maharashtra

Scalefull Technologies LLP

- Developed and deployed scalable web applications utilizing the MERN stack to deliver robust client solutions.
- Engineered secure RESTful APIs, implemented user authentication protocols, and optimized database operations.
- Enhanced UI/UX components and resolved critical bugs, significantly improving overall application performance.
- Collaborated seamlessly with cross-functional teams throughout the development, testing, and deployment lifecycles.

### Web Development Intern

07/2022 – 01/2023 | Nashik, Maharashtra

Cyphersa Software LLP

- Contributed to the development of dynamic and responsive web components using React.js and JavaScript/TypeScript.
- Assisted in the rigorous testing and debugging of backend services, ensuring high code quality and system reliability.
- Worked closely with the QA team to identify, troubleshoot, and resolve software bottlenecks efficiently.

## EDUCATION

### Bachelor of Engineering in Computer Engineering

09/2023 – Present | Mumbai

YTIET, Mumbai

Final Year

### Diploma in Computer Engineering

07/2021 – 05/2023 | Nashik

MIT Polytechnic, Nashik

Score: 76%

## TECHNICAL SKILLS

**Languages** — Java, Python, JavaScript, TypeScript, SQL | **Frontend** — React.js, Tailwind CSS | **Backend & APIs** — Spring Boot, Node.js, Express.js, FastAPI, Django, RESTful APIs | **Databases** — MySQL, MongoDB Atlas | **Tools & Libraries** — Git, OpenAI Whisper, FFmpeg, MoviePy | **Concepts** — Microservices Architecture, MVC Pattern, Relational Database Design, Agile/Scrum

## PROJECTS

### AutoCut Pro

AI-Driven Full-Stack Multimedia Processing Pipeline

- Tech Stack: React.js, Spring Boot, FastAPI, MySQL, OpenAI Whisper, MoviePy, FFmpeg
- Decoupled Architecture: Designed a scalable 3-tier microservices architecture automating end-to-end video editing workflows.
- AI Voice Activity Detection: Integrated OpenAI's Whisper model with fine-tuned parameters to process multilingual audio (Hinglish), filtering ambient noise and generating synchronized Devanagari .srt subtitles.
- Turbo Render Engine: Optimized video processing latency by 10x by engineering a multi-threaded CPU rendering pipeline via MoviePy (4 parallel threads) with explicit frame-rate validation.
- Secure Management: Implemented strict client-side verification (Max 50MB limits) and utilized memory-efficient resource blob mapping in Spring Boot for secure, high-speed downloads.

### ApnaBazaar

Full-Stack E-commerce Platform

- Tech Stack: Java, Spring Boot, React.js, MySQL, REST APIs
- Engineered a complete full-stack e-commerce web application with secure user authentication, dynamic product catalogs, and seamless checkout.
- Designed a highly structured relational schema using MySQL to optimize data storage and ensure smooth client-server data flow.
